   READING PASSAGE
   ======================================================== */

const readingPassage = {
  title: "Reading Passage: The Project That Changed Our Class",
  paragraphs: [
    "Two weeks ago, our English group prepared a special international exhibition. At the beginning, several students believed it would be just another normal school assignment. However, when the teacher explained that every team had to select a country and present its food, music, traditions, clothes, famous places, and basic expressions, the activity became more exciting. Some teams chose Korea, Mexico, Canada, and Spain, while others selected countries
```

they knew from music, soccer, movies, or social media. Little by little, the classroom looked different because students brought posters, drawings, flags, decorations, and short videos.",
"The food and music presentations were the most popular parts of the exhibition. One team brought cookies, another prepared a simple drink, and another group played traditional music while they explained their country. Of course, there were some problems. One team forgot its poster, and another team could not open its video file. Even so, they did not stop the presentation. They improvised, spoke in English, and answered questions from their classmates. Some students who usually did not participate much started speaking with more confidence because they felt interested in their topic.",
"At the end of the activity, the students understood that English is more than grammar and vocabulary. They practiced organization, teamwork, creativity, and public speaking. They also learned that culture includes food and clothing, but it also includes history, values, people, and different ways of understanding life. The teacher explained that learning English helps students communicate real ideas, not only repeat sentences from a book. After the exhibition, many students said they felt more confident and less afraid of speaking English in front of the group."
]

Object.assign(readingPassage, {
  title: "Reading Passage: A Volunteer Day at the Community Garden",
  paragraphs: [
    "Last month, our English class joined a volunteer day at a small community garden near the school. At first, many students thought the activity would be tiring and not very useful. However, when the organizer explained that the garden provided vegetables for older people in the neighborhood, the group became more interested. Each team received a different job: some students watered plants, others cleaned paths, painted signs, organized tools, or wrote short labels in English and Spanish.",
    "The morning was busy, but it was also enjoyable. One team was planting tomatoes while another team was preparing the soil for new flowers. There were a few problems. A hose broke, two students forgot their gloves, and one group could not find the seeds it needed. Instead of stopping, the students shared materials, asked for help, and solved the problems together. Some students who usually stayed quiet in class gave clear instructions because they knew their task well.",
    "At the end of the day, the garden looked cleaner and more organized. The students realized that learning English can be connected to real activities, not only exercises in a notebook. They practiced vocabulary, teamwork, responsibility, and communication. The teacher said that small actions can improve a community when people cooperate. After the visit, several students decided to return on Saturdays because they wanted to continue helping."
